DATE MAILED: 03/09/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

11.1

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>	
	10/501,880	TEMLER ET AL.	
	<b>Examiner</b>	<b>Art Unit</b>	
	Thao P. Le	2818	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 29 December 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-10 is/are pending in the application.
- 4a) Of the above claim(s) 9 and 10 is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All    b) ☐ Some \*    c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date 1 page
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

DETAILED ACTION

**Priority**

Acknowledge is made of applicants' claim for foreign priority base on an application 10202138.4 filed in Germany on 01/21/2002, and an application 10217261.7 filed in Germany on 04/18/2002.

It is noted that Applicants have filled a certified copy of said application as required by U.S.C 119, which papers have been placed of record in the file.

***Election/Restriction***

Examiner confirms that Applicants elected to prosecute Claims 1-8 and have withdrawn Claims 9-10 without prejudice.

***Information Disclosure Statement***

Information Disclosure Statement (IDS) filed on **12/17/04** and made of record.  
The references cited on the PTOL 1449 form have been considered.

Claims 1-8 are presented for examination. Claim 8 has been amended.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

**(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.**

**Claims 1-2, 4-6, 8 are rejected under 35 USC 102 (b) as being anticipated by Jammy et al., U.S. Patent No. 6,222,218, hereinafter Jammy.**

Regarding claims 1, 8 Jammy discloses a memory chip comprising a substrate 10, a memory cells having a trench capacitor 36 and a transistor 40a (See Figs. 3a-3l), the trench capacitor at least partially having a filling (Figs. 3f-3j), the transistor having source/drain terminals 50, and a gate terminal 16b/16d/16e, the drain terminal being electrically conductively connected to the trench capacitor (Fig. 3l), wherein the filling at least partially has a material which is unstable at high temperatures (high dielectric constant material 24, sensitive to high temperature, lines 7-29, Col. 8) and the filling is not exposed to a high-temperature process. It is inherent that the filling is formed after high temperature process during fabrication because the filling 24 in Jammy is described as temperature sensitive and is unstable at the temperature of about 550 oC and above.

Regarding claim 2, Jammy discloses the filling has at least one of the materials from the following group: zirconium oxide, strontium titanium oxide (lines 24-28, Col. 8).

Regarding claim 4, Jammy discloses the filling at least partially has a metallic material 26 (lines 24-39, Col. 8).

Regarding claim 5, Jammy discloses the wall of the trench is at least partially covered with a dielectric material 20 (or 24), a metallic layer is at least partially applied on the dielectric layer (bottom/top electrode, 22/24) and the metallic is connected to drain terminal of the transistor (Fig. 2i).

Regarding claim 6, Jammy discloses wherein an electrically conductive layer formed in a manner adjoining the trench in the substrate (50, Fig. 3I)

### **Claim Rejections - 35 USC § 103**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jammy et al., U.S. Patent No. 6,222,218, hereinafter Jammy, in view of Laibowitz et al., U.S. Patent No. 6,211,543, hereinafter Laibowitz.

Regarding claim 3, Jammy discloses the filling is a high dielectric constant material such as zirconium oxide, strontium titanium oxide (lines 24-28, Col. 8) but fails to disclose the filling is silicate compound. Laibowitz discloses the filling of the trench in trench capacitors is silicate compound. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use either the dielectric materials disclosed in Jammy or silicate of Laibowitz because these materials have similar chemical properties such as high dielectric constant and unstable at high temperature.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jammy et al., U.S. Patent No. 6,222,218, hereinafter Jammy.

Regarding claim 7, Jammy discloses the opening is formed in the substrate and a conductive connection between the filling and the drain terminal (30, Fig. 3I) is formed through the opening and a dielectric layer is at least partially applied on a side of the trench. It is conventional in the art that the epitaxial layer would have been formed on the substrate and the opening is formed within the epitaxial layer.

When responding to the office action, Applicants' are advice to provide the examiner with the line numbers and page numbers in the application and/or references cited to assist the examiner to locate the appropriate paragraphs.

A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) day from the day of this letter. Failure to respond within the period for response will cause the application to become abandoned (see M.P.E.P 710.02(b)).

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thao P. Le whose telephone number is 571-272-1785. The examiner can normally be reached on M-T (7-6).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on 571-272-1787. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Thao P. Le

Examiner

Art Unit 2818

March 3, 2006.
